

The Coweta County Water & Sewerage Authority offers a **Leak Adjustment Program** to accompany its Leak Adjustment Policy. Details of the Leak Adjustment Program are below along with coverage amounts charged per meter:

- Eligible residential and irrigation customers are enrolled in the first tier of residential and irrigation coverage, which is \$1,000 coverage (per year) for \$2.00/month. Additionally, you may request to enroll in the second tier, which is \$2,000 in residential and irrigation coverage (per year) for \$4.00/month.
- Eligible Commercial, Industrial and School (CIS) customers are enrolled in the first tier of CIS coverage, which is \$5,000 coverage (per year) for \$10.00/month. Additionally, CIS customers may request to enroll in the second tier, which is \$10,000 of CIS coverage (per year) for \$20.00/month.

With Coweta County Water & Sewerage Authority's Leak Adjustment Program, should you have a leak you are **responsible for paying your base charge and your average bill over the last 12 months**. The adjustment coverage can only be used towards one leak in a 12 month period. For water charges in excess of coverage, a courtesy adjustment may be applied following application of coverage.

We will apply a charge of \$2.00/month for \$1,000 leak adjustment coverage for residential and irrigation and \$10.00/month for \$5,000 leak adjustment coverage for CIS service. If you wish to apply for the higher tiers of coverage, please email us at contactus@cowetawater.com or call (770)254-3710.

Should you decide to **not** participate in our Leak Adjustment program, please let us know that you wish to "opt out" by emailing us at contactus@cowetawater.com, or completing the waiver contained within this document. We will remove the charge on future bills; however, please note that you will be responsible for paying all balances due after we provide any adjustment subject to our updated Leak Adjustment Policy and at our sole discretion.

No credit will be given in any twelve (12) month period above the coverage amount for one leak occurrence; nor to anyone who has opted out of coverage. "Leak Adjustment Program" as implemented by the Coweta County Water & Sewerage Authority, shall mean a program by which eligible customers will be protected from inordinate charges in the event of a leak as defined in the Leak Adjustment. No protection is afforded to any eligible customer who fails to repair a defective waterline leak after ten (10) days of notification or detection of said leak. The Authority may deny leak protection coverage partially, or in its entirety, at its sole discretion.
