| Shenandoah WWTF UV Disinfection Equipment Lifecycle Cost Evaluation Form |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Item | Units | Value | Notes |
| A. System Design Criteria and Configuration |  |  |  |  |
| A. 1 | Design UV Dose | mJ.cm2 | 50.00 |  |
| A. 2 | Total Number of Channels | \# | 2.00 |  |
| A. 3 | Organism |  | MS2 |  |
| A. 4 | UV Transmittance |  | 65\% @ 254 nm |  |
| A. 5 | Number of Banks per Channel | \# |  | Vendor Entry |
| A. 6 | Total Number of Banks | \# |  | Vendor Entry |
| A. 7 | Number of Modules per Bank | \# |  | Vendor Entry |
| A. 8 | Total Number of Modules | \# |  | Vendor Entry |
| B. Equipment |  |  |  |  |
| B. 1 | Number of Lamps per Module | \# |  | Vendor Entry |
| B. 2 | Total Number of Lamps | \# |  | Vendor Entry |
| B. 3 | Power Consumption per lamp | Watts |  | Vendor Entry |
| B. 4 | No. of Ballasts | \# |  | Vendor Entry |
| B. 5 | No. of Quartz Sleeves | \# |  | Vendor Entry |
| B. 6 | No. of UV Intensity Sensors | \# |  | Vendor Entry |
| B. 7 | No. Replaceable Cleaning Components | \# |  | Vendor Entry |
| C. Equipment Operating at Average Daily Flow Condition 0.9 MGD |  |  |  |  |
| C. 1 | No. of Lamps | \# |  | Vendor Entry |
| C. 2 | No. of Ballasts | \# |  | Vendor Entry |
| C. 3 | No. of Quartz Sleeves | \# |  | Vendor Entry |
| C. 4 | No. of UV Intensity Sensors (UVIS) | \# |  | Vendor Entry |
| C. 5 | No. of Replaceable Cleaning Components (RCC) | \# |  | Vendor Entry |
| D. Parts Warranty |  |  |  |  |
| D. 1 | Lamp Warranty | hours |  | Vendor Entry |
| D. 2 | Lamp Warranty | years |  | Divide Value in D. 1 by 8,760 hrs/yr. Entry to be to the nearest Hundreth |
| D. 3 | Ballast Warranty | years |  | Vendor Entry |
| D. 4 | Quartz Sleeve Warranty | years |  | Vendor Entry |
| D. 5 | UVIS Warranty | years |  | Vendor Entry |
| D. 6 | RCC Warranty | years |  | Vendor Entry |
| E. Replacement Parts Pricing |  |  |  |  |
| E. 1 | Lamp Cost | \$/unit |  | Vendor Entry |
| E. 2 | Ballast Cost | \$/unit |  | Vendor Entry |
| E. 3 | Quartz Sleeve Cost | \$/unit |  | Vendor Entry |
| E. 4 | UVIS Cost | \$/unit |  | Vendor Entry |
| E. 5 | RCC Cost per lamp | \$/unit |  | Vendor Entry |
| F. Estimated No. of Parts Replaced Annually |  |  |  |  |
| F. 1 | Estimated Annual Lamp Replacement | \# |  | Divide value in C. 1 by value in D.2. Round up to the nearest whole number |
| F. 2 | Estimated Annual Ballast Replacement | \# |  | Divide value in C. 2 by value in D.3. Round up to the nearest whole number |
| F. 3 | Estimated Annual Sleeve Replacement | \# |  | Divide value in C. 3 by value in D.4. Round up to the nearest whole number |
| F. 4 | Estimated Annual UVIS Replacement | \# |  | Divide value in C. 4 by value in D.5. Round up to the nearest whole number |
| F. 5 | Estimated Annual RCC Replacement | \# |  | Divide value in C. 5 by value in D.6. Round up to the nearest whole number |

| Shenandoah WWTF UV Disinfection Equipment Lifecycle Cost Evaluation Form |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Item | Units | Value | Notes |
| G. Estimated Annual Part Replacement Cost |  |  |  |  |
| G. 1 | Est. Annual Lamp Replacement Costs | \$ |  | Multiply value in E. 1 by value in F.1. Round up to the nearest dollar |
| G. 2 | Est. Annual Ballast Replacement Costs | \$ |  | Multiply value in E. 2 by value in F.2. Round up to the nearest dollar |
| G. 3 | Est. Annual Sleeve Replacement Costs | \$ |  | Multiply value in E. 3 by value in F.3. Round up to the nearest dollar |
| G. 4 | Est. Annual UVIS Replacement Costs | \$ |  | Multiply value in E. 4 by value in F.4. Round up to the nearest dollar |
| G. 5 | Est. Annual RCC Replacement Costs | \$ |  | Multiply value in E. 5 by value in F.5. Round up to the nearest dollar |
| G. 6 | Total Est. Annual Replacement Costs | \$ |  | Add values G. 1 through G. 5 |
| H. Estimated Labor Requirements |  |  |  |  |
| H. 1 | Time to Replace Lamp | hours |  | Vendor Entry |
| H. 2 | Time to Replace Ballast | hours |  | Vendor Entry |
| H. 3 | Time to Replace Sleeve | hours |  | Vendor Entry |
| H. 4 | Time to Replace UVIS | hours |  | Vendor Entry |
| H. 5 | Time to Replace RCC | hours |  | Vendor Entry |
| I. Estimated Annual Labor Costs |  |  |  |  |
| 1.1 | Est. Labor Rate | \$/hour |  |  |
| 1.2 | Est. Annual Labor Cost for Lamp Replacement | \$ | \$0.00 | Multiply value in F. 1 by value in H. 1 by Value in I. 1 |
| 1.3 | Est. Annual Labor Cost for Ballast Replacement | \$ | \$0.00 | Multiply value in F. 2 by value in H. 2 by Value in I. 1 |
| 1.4 | Est. Annual Labor Cost for Sleeve Replacement | \$ | \$0.00 | Multiply value in F. 3 by value in H. 3 by Value in I. 1 |
| 1.5 | Est. Annual Labor Cost for UVIS Replacement | \$ | \$0.00 | Multiply value in F. 4 by value in H. 4 by Value in I. 1 |
| 1.6 | Est. Annual Labor Cost for RCC Replacement | \$ | \$0.00 | Multiply value in F. 5 by value in H. 5 by Value in I. 1 |
| 1.7 | Total Est. Annual Labor Cost | \$ | \$0.00 | Add values I. 2 through I. 6 |
| J. Estimated Annual Power Cost |  |  |  |  |
| J. 1 | Power Draw at Max Daily Flow - 12 MGD | kW |  | Vendor Entry |
| J. 2 | Power Draw at Monthly Average Flow - 6 MGD | kW |  | Vendor Entry |
| J. 3 | Power Draw at Minimum Flow - 2 MGD | kW |  | Vendor Entry |
| J. 4 | Operating time at Peak Condition | \% | 5\% |  |
| J. 5 | Operating time at Average Condition | \% | 50\% |  |
| J. 6 | Operating time at Minimum Condition | \% | 45\% |  |
| J. 7 | Power Cost | \$/kWh | \$0.15 |  |
| J. 8 | Power Usage for Operating time at Peak Condition | kW |  | Multiple value in J. 1 by value in J. 4 by 8,760 hrs/yr |
| J. 9 | Power Usage for Operating time at Average Condition | kW |  | Multiple value in J. 2 by value in J. 5 by $8,760 \mathrm{hrs} / \mathrm{yr}$ |
| J. 10 | Power Usage for Operating time at Minimum Condition | kW |  | Multiply value in J. 3 by value in J. 6 by 8,760 hrs/yr |
| J. 11 | Total Annual Power Usage | kW |  | Add Values in J.8, J.9, and J. 10 |
| J. 12 | Est. Annual Power Costs at AF | \$ |  | Multiply value in J. 11 by J. 7 |
| K. Estimated Present Worth |  |  |  |  |
| K. 1 | TOTAL EQUIPMENT COST | \$ |  | Vendor Entry |
| K. 2 | Est. Total Annual Replacement Parts Cost | \$ |  | Enter value in G. 6 |
| K. 3 | Est. Total Annual Labor Cost | \$ |  | Enter value in 1.7 |
| K. 4 | Est. Total Annual Power Cost at ADF | \$ |  | Enter value in J. 12 |
| K. 5 | Est. Total Annual Operating Costs | \$ |  | Add values in K. 2 through K. 4 |
| K. 6 | Present Value of Est. Annual Operating Costs | \$ |  | Multiply value in K. 5 by 12.46. Assumes (P/A, 5\%, 10) |
| K. 7 | ESTIMATED PRESENT WORTH (10 years) | \$ |  | Add values in K. 1 and K. 6 |
